

SSS Project Development LLP

The SSS Project Development LLP is headquartered in Singapore

"Triple S" as the operating subsidiary is responsible for the implementation of the projects of MMM (Soft Product) on site. These have their origins in Homayoun Esfarjani's ingenuity, always in the spirit of a humane and efficient economy.

The three fields of competence are Support, Sales and Service:

Support includes the care, guidance and support of projects, from the communication with investors locally, coordination of suppliers up to the finished product.

Sales include the creation of viable business plans, analysis of distribution structures and localization of the ideal offtake partner (finance and marketing).

Services include technical support, modernization, operation and maintenance of the properties and the training of management and staff.

It provides project and product development, mainly in the fields of

- heavy industry, infrastructure and training
- food and beverages, packaging
- industrial design, mineral processing
